Rules of Conduct

None specified

Engineer Springs CWMU Description

The Engineer Springs CWMU is located north of the Bear River National Migratory Bird Refuge on Engineer Mountains and abuts the Golden Spike National Historic Site. The highest point on the Unit is in the south at **5300 feet**. There are also a couple of peaks in the northeast corner that reach about 5200 feet. Lower elevations are around **4300 feet** near Lampo Junction. Generally there is a hilly region in the north, some flatter areas towards the south before elevation rises up again.

Most of the Engineer Springs Cooperative Wildlife Management Unit (CWMU) is covered with Inter-Mountain Basins **Big Sagebrush Shrubland** (48). But, there are large patches of **Agriculture** (114) and many smaller patches of **Invasive Annual Grassland** (121). In the southeast corner are extensive areas of Inter-Mountain Basins **Greasewood Flat** (82), and scattered throughout the Unit are much smaller areas of Inter-Mountain Basins **Semi-Desert Grassland** (76).
